06/27/2017 - 00:00

One of the projects participating in the 8th edition of the **Global Junior Challenge** ^[1] is called "**Opzione R**" and is coordinated by **Donatella Falciai**, Professor of Mathematics and Physics at the Liceo **Democrito** ^[2] in Rome.

Professor Donatella, who has introduced generations of students to the **RomeCup** ^[3] and even to the World Robotics Championships in China, has now accepted a new challenge: extending the most innovative educational activities at the Liceo Democrito to every student.

Project "**Opzione R**" aims to "implement a new curriculum that moulds traditional studies, coding and robotics, digital didactic activities and transversal methodological innovation on all subjects. There is no increase in programme hours and all the previous learning outcomes are still pursued."
