Tipo di progetto

Inserimento dei giovani nel mondo del lavoro

Descrizione del progetto

Description Frase (max. 500 characters):

Through training in software testing, we help young people from excluded neighbourhoods to reach an employment in the software industry that improves their life quality and stimulates them to develop a profession

Project Summary (max. 2000 characters):

Nahual is an open community integrated mostly by software professionals and those former

students that after the course started working, studying in a university and now keep participating as referents or even sometimes are at front of the class. Our main objective is social inclusion, and we do it by sharing the experience and knowledge but also the relationships and opportunities that we developed on our professional life.

It is a project where where no one pays and no one is paid, that started as social work in 2004 and became a course like now in 2009. We present the project to software companies so they give to the students the opportunity of an interview, and stay beside them through the work search process and later, during their firsts experiences. Up to now, there are more of 20 former students that got a job as software testers, many of which also started studying in the university.

On 2013 Nahual was awarded with the Sadosky price for Digital Inclusion and also the Golden Sadosky. <http://www.cessi.org.ar/sadosky/ganadores-2013> ^[1].

Nahual has also been reproduced in other four other nodes (Bariloche, La Plata, San Telmo, La Paternal), and there is people in Uruguay and Colombia working to re-create the experience. On the other nodes there might be different activities, such as programming for kids or hardware reparation. What they all have in common is the objective of share and include from what we know, that is the software technology

Da quando è funzionante il vostro progetto?

Obiettivi ed elementi di innovazione

Through training in software testing, we help young people from excluded neighbourhoods to reach an employment in the software industry that improves their life quality and stimulates them to develop a profession. Classes are given on saturday morning during four months, with focus on the practice of both technical and cultural preparation for a working environment. There are also meetings to help participants to create their resume and be prepared for working interviews

Risultati

Describe the results achieved by your project How do you measure (parameters) these. More than 1000 people have been trained in software testing and have found employment in the software industry.

(max. 2000 characters):
How many users interact with your project monthly and what are the preferred forms of interaction? (max. 500 characters): There are about 100 users interacting with the project monthly. The preferred forms of interaction are through email, phone, and in person meetings.

Sostenibilità

What is the full duration of your project (from beginning to end)?: Meno di 1 anno

What is the approximate total budget for your project (in Euro)?: Meno di 10.000 Euro

What is the source of funding for your project?: Altro

Il progetto è economicamente autosufficiente?: Sì

Since when?: 2009-02-27 23:00:00

Trasferibilità

Has your project been replicated/adapted elsewhere?: Sì

Where? By whom?: With different activities and levels of maturity, Nahual has nodes in Bariloche (Argentina) at the school Amuyen, La Plata (Argentina) on an orphanage called Pantalón Cortito, Paternal (Argentina) on a communitary center, San Telmo (Argentina) and there is also a node in Montevideo working to develop it in Uruguay

What lessons can others learn from your project? (max. 1500 characters):

There is an opportunity
People make achievements
There is people in the world
economic reward

Are you available to help others to start or work on similar projects?: Sì

Informazioni aggiuntive

Barriers and Solutions (max. 1000 characters): There are many, but to be brief i can name - Adapt the project to the needs of the participants to make it practical and attractive - Develop the project with the support of employers of the students - Provide tools to face an interview after they complete the course

Future plans and wish list (max. 750 characters): We would love to keep spreading the spirit of the project
software testing [2] social inclusion [3]
