Descrizione del progetto

Description Frase (max. 500 characters):

"Small artists" it is first part of a series of 3 blogs class blog who want to show to student's parents their first steps in "the wonderful world of school".

Project Summary (max. 2000 characters):

The blog was created in order to create a bridge between school and parents. On the blog are the activities made with the students who starting when they have only 6-7 years old during

the first grade and its continuation by other 2 blogs for second and third grade. I switched from simple interagency activities, knowledge and communication such as firs prom and I continued with the Digital Story Telling, educational projects, parties, performances, educational activities and the promotion of talented children, finally rewarded with prizes. I think that our work can be an exemple of good practice.

teacher is the artist that shape and stimulates creative thinking child it depends on the children's development. The contemporary education must be adapted to the age of children to stimulate their interest and to achieve goals. In my opinion, this means the combination of some elements of the game, good cheer, with useful information about the life and activities of children everywhere. When students learn differently, become more creative, more motivated, aware that they can claim their work, they can cooperate with others that have different learning opportunities in new contexts.

Are you available to help others to start or work on similar projects?: Sì

Informazioni aggiuntive

Barriers and Solutions (max. 1000 characters): Maybe we have problems but it is important to determine the development of creative educational environment and its influence to the development of students skills when in different situations.

Future plans and wish list (max. 750 characters): I can say that I noticed that both exercises and challenges in extracurricular activities, stimulate the creative potential of students, spontaneous responses, spontaneity, free expression of their opinions, to conduct participatory and creative as is inhibits development of originality. Positive feedback throughout the activities and mobilization of subjects in solving tasks. From the experience of students has creative potential that integrates cognitive and informational mechanisms triggered and sustained by the expression, independence, cognitive attitude beginning a new blog for fourth grade.
